

# Flexible

- Centralized supply voltage
- Expansion via power supply modules

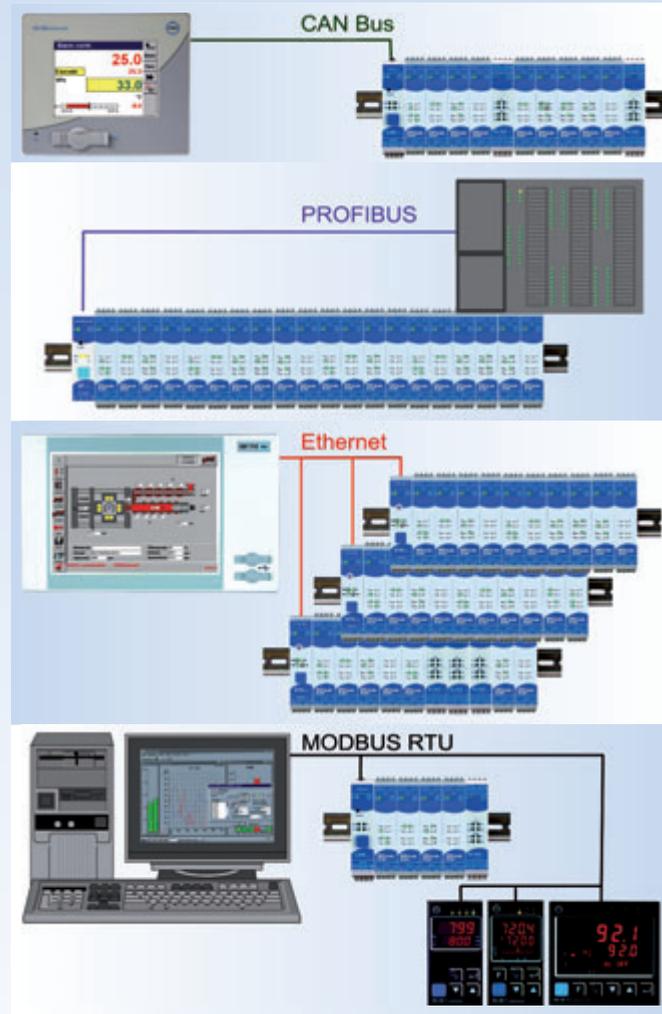

- System Wizard in BlueControl®
- Centralized Engineering

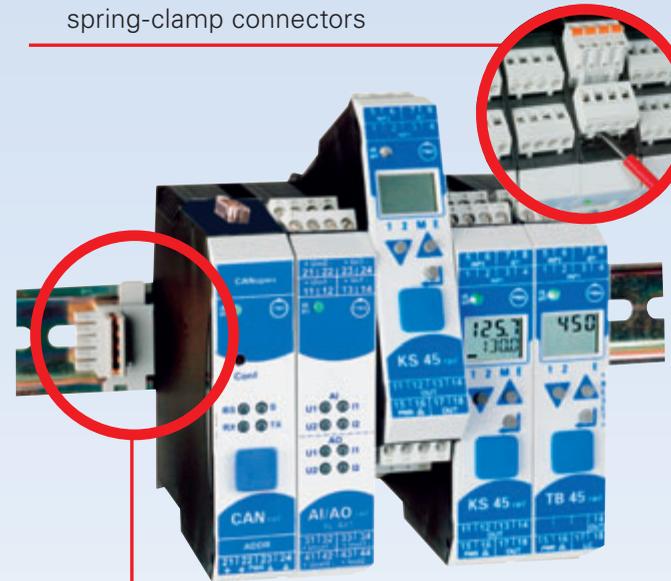

# System solutions

with standard field buses

# Practical

- Plug-in screw terminals or spring-clamp connectors

- Direct inter-module links
- Simple, close-packed mounting
- Hot swappable

Do you have any questions regarding your specific needs?

Please contact us directly – we will be happy to help you.

# Comprehensive Intelligent fieldbus modules rail line

- Field bus coupler
- Digital and analog inputs/outputs
- Transmitter UNIFLEX CI 45
- Universal controller KS 45
- Temperature limiter TB 45

## At a glance

- **Field bus coupler**
  - CANopen: RL40-CANopen
  - PROFIBUS DP: RL40-DP
  - Ethernet ModBus/TCP: RL40-ETH
  - ModBus RTU: RL40-MOD \*)
- **Bus extension from 16 up to 62 modules**
  - PWR Power supply module: RL40-PWR

### Analog and digital inputs and outputs

- **Analoge inputs**
  - AI Universal module: RL 422-0 AI Analog inputs, 4 x I / U / TPS / potentiom. (16 bits)
  - AI Module Pt 100: RL 423-0 RTD 4 x Pt 100 galvanically isolated
  - AI Module Pt 1000: RL 423-1 RTD 4 x Pt 1000 galvanically isolated
  - AI Module Pt 100/Pt 1000: RL 423-2 RTD 4 x Pt 100/Pt 1000 galvanically isolated
  - AI Thermocouple module: RL 424-0 TC 2 x TC galvanically isolated
  - AI Thermo./Lambda module: RL 424-1 TC 2 x TC / O<sub>2</sub> (mV)
  - AI Thermocouple module: RL 424-2 TC 4 x TC galvanically isolated 2/2 \*)
- **Analog outputs**
  - AO Analog outputs: RL 431-0 AO 4 x I / U (±10 V / ±20 mA, 12 bits) \*)
- **Analog inputs/outputs**
  - AIO Combi-module: RL 461-0 AI/AO Combination module  
2 x AI (±U / ±I, 16 bits) Difference inputs  
2 x AO (±U / ±I, 12 bits)
- **Digital inputs**
  - DI Digital inputs: RL 442-0 DI Digital inputs 2 x 4 x 24 VDC (pnp)
  - DI Digital inputs: RL 442-1 DI Digital inputs 2 x 4 x -24 VDC (nnp)
  - DI Digital inputs: RL 442-2 DI Digital inputs 2 x 4 x contact (potential-free)
  - DI Digital inputs: RL 443-0 DI 4 x contact, potential-free (115/230 VAC)
- **Digital outputs**
  - DO Digital outputs: RL 451-0 DO Digital outputs 2 x 4 x 24 VDC/2A
  - DO Digital outputs: RL 451-1 DO Digital outputs 2 x 4 x 24 VDC/2A (freewheel diode)
  - DO Digital outputs: RL 452-0 REL Relay outputs 4 x 230 VDC/5A

\*) in preparation

## RL 400 in a nutshell

- Supported field buses:
  - o CANopen
  - o Ethernet with ModBus/TCP protocol
  - o PROFIBUS DP with DPV1 protocol
  - o ModBus RTU
- Simple field bus integration for:
  - o Analog I/O modules
  - o Digital I/O modules
  - o Universal transmitter UNIFLEX CI 45
  - o Universal controller KS 45
  - o Temperature limiter TB 45
- Signal processing in output modules, e.g. automatic pulse response
- Signal processing through individual linearization
- Compact design, only 22,5 mm wide
- Top-hat rail mounting (EN 50 022)
- Plug-in screw terminals or spring-clamp connectors
- Function modules replaceable during operation (hot swap)
- Direct inter-module connections in top-hat rail
- Centralized 24 VDC energization
- Coupler handles up to 16 function modules
- Expandable up to 62 modules by means of additional supply units
- **BluePort**<sup>®</sup>-interface for the Engineering Tool
- **BlueControl**<sup>®</sup>-software with system Wizard and centralized access to all function modules

**rail line**
