

2nd October 2019**REACH Regulation (EC) No 1907/2006**

West Control Solutions (WCS) is aware of the requirements of the REACH regulation and has identified its responsibilities to the best of its knowledge.

WCS is a "Supplier, manufacturer and / or importer of articles".

WCS does not need to register any substances as we do not sell substances, preparations nor articles containing any substances that are intended to be released at any time. Our products have a special design which determines the function to a greater degree than does the chemical composition.

The substances that are used by WCS in the manufacture of our products are common to the electronics manufacturing industry. Therefore, on an ongoing basis, we are confident of these substances being available to us or alternatives being identified.

We are also working with our suppliers to identify what substances are used in the manufacture of the components supplied to us and to ensure our supply is not affected by additions to the list of substances of very high concern (SVHC's) controlled under REACH.

WCS will continue to monitor all further obligations with regards to REACH and any consequences of Brexit. We will take action to prevent any impact to our customers.

In consideration of these factors we are confident of maintaining supplies of our products.

Paul Barber

QHSE Manager
